**Maynilad Wins Global Honour Award**

Metro Pacific and DMCI-led Maynilad Water Services, Inc. (Maynilad) was recently conferred the Global Honour Award by the International Water Association (IWA) in Busan, South Korea.

Maynilad won the prestigious award for its Water Service Transformation program, which resulted in the dramatic improvement and accelerated expansion of water services in the West Zone in just five years.

Launched upon the water company's re-privatization in 2007, the program involved the development and implementation of a holistic innovation strategy that led to the transformation of Maynilad's water system, people, business, customer services and public image.

The lone awardee from the Philippines, Maynilad competed against entries from all over the world in the Operations/Management Category of the Global Project Innovation Awards (PIA). Its victory in the Asia-Pacific heat of the PIA last July allowed it to compete against Regional Awardees from East Asia, Europe, West Asia and North America for the Global Project Awards.

"This award is a testament to the hard work and dedication of the Maynilad organization, as well as the transformative management expertise of Metro Pacific and DMCI. But more importantly, it is a victory for the Philippines because we were able to prove that we could stand side by side with the best water engineering companies in the world," said Maynilad President and CEO Ricky P. Vargas.

The Global Project Innovation Awards recognizes innovation and excellence in water engineering projects around the world. It is organized by IWA, a global network of over 10,000 water professionals who collaborate to promote the development and implementation of innovative and effective approaches to water management.
