

Terms of Reference and Specifications for the Procurement of Culture Media

Delivery Terms:

10-60 working days upon receipt of P.O.

Payment Terms:

1-30 days upon full delivery, inspection and acceptance

Description/s:

5 BOTTLE Plate Count Agar

Specifications:

- Dehydrated media, 500grams per bottle
- Media bottle must have compliance marks/label: ISO, CE, etc.
- The product brand should be manufactured in compliance with ISO 9001 and/or ISO 13485 standard. The brand must have an ISO certification.
- Provide necessary documentation such as SDS and certification of analysis (COA) for each batch to ensure product quality, sterility, and performance.
- Shelf Life: Must have at least 12 months from the date of manufacture

2 BOTTLE Nutrient Agar

Specifications:

- Dehydrated media, 500grams per bottle
- Media bottle must have compliance marks/label: ISO, CE, etc.
- The product brand should be manufactured in compliance with ISO 9001 and/or ISO 13485 standard. The brand must have an ISO certification.
- Provide necessary documentation such as SDS and certification of analysis (COA) for each batch to ensure product quality, sterility, and performance.
- Shelf Life: Must have at least 12 months from the date of manufacture

2 BOTTLE Nutrient Broth

Specifications:

- Dehydrated media, 500grams per bottle
- Media bottle must have compliance marks/label: ISO, CE, etc.

- The product brand should be manufactured in compliance with ISO 9001 and/or ISO 13485 standard. The brand must have an ISO certification.
- Provide necessary documentation such as SDS and certification of analysis (COA) for each batch to ensure product quality, sterility, and performance.
- Shelf Life: Must have at least 12 months from the date of manufacture

3 BOTTLE Tryptic Soy Agar

Specifications:

- Dehydrated media, 500grams per bottle
- Media bottle must have compliance marks/label: ISO, CE, etc.
- The product brand should be manufactured in compliance with ISO 9001 and/or ISO 13485 standard. The brand must have an ISO certification.
- Provide necessary documentation such as SDS and certification of analysis (COA) for each batch to ensure product quality, sterility, and performance.
- Shelf Life: Must have at least 12 months from the date of manufacture

3 BOTTLE Tryptic Soy Broth

Specifications:

- Dehydrated media, 500grams per bottle
- Media bottle must have compliance marks/label: ISO, CE, etc.
- The product brand should be manufactured in compliance with ISO 9001 and/or ISO 13485 standard. The brand must have an ISO certification.
- Provide necessary documentation such as SDS and certification of analysis (COA) for each batch to ensure product quality, sterility, and performance.
- Shelf Life: Must have at least 12 months from the date of manufacture

2 BOTTLE Peptone Water

Specifications:

- Dehydrated media, 500grams per bottle
- Media bottle must have compliance marks/label: ISO, CE, etc.
- The product brand should be manufactured in compliance with ISO 9001 and/or ISO 13485 standard. The brand must have an ISO certification.
- Provide necessary documentation such as SDS and certification of analysis (COA) for each batch to ensure product quality, sterility, and performance.

- Shelf Life: Must have at least 12 months from the date of manufacture

1 BOTTLE EMB Agar

Specifications:

- Dehydrated media, 500grams per bottle
- Media bottle must have compliance marks/label: ISO, CE, etc.
- The product brand should be manufactured in compliance with ISO 9001 and/or ISO 13485 standard. The brand must have an ISO certification.
- Provide necessary documentation such as SDS and certification of analysis (COA) for each batch to ensure product quality, sterility, and performance.
- Shelf Life: Must have at least 12 months from the date of manufacture

1 BOTTLE Mannitol Salt Agar

Specifications:

- Dehydrated media, 500grams per bottle
- Media bottle must have compliance marks/label: ISO, CE, etc.
- The product brand should be manufactured in compliance with ISO 9001 and/or ISO 13485 standard. The brand must have an ISO certification.
- Provide necessary documentation such as SDS and certification of analysis (COA) for each batch to ensure product quality, sterility, and performance.
- Shelf Life: Must have at least 12 months from the date of manufacture

Purpose: Culture Media for Heterotrophic Plate Count and media used for propagation of quality control microorganisms.
